Hey guys what can i say I love this game its a fast pace bouncey platformer shootumup dodge game. It has great music and is a hella lot of fun check out my video of the game.
Also the devs are amazing .

https:\/\/www.youtube.com\/watch?v=vbrvl6Z4GvY. Charming metrovania with a HUGE world. No need to wait for a sale on this one IMO.. Panda <3. Perfect, wonderful, amazing! One of the best VR games – the example how VR should be looked like! No gameplay but very-very bright colors. Simple things that were made in perfect way with love and knowledge knowhow. Highly recommend to everybody!. iTs funny game but very easy, can complete it in 30' or less. I recommend is it free. It's a fun retro fps rougelike. Awesome soundtrack & the oldschool sound effects are pretty good too.
. it's fun but i can't continue without the rest of the leveld

Excellent Digital Hero Quest game, Great, friendly Dev.. Cheap, pointless shovelware to grab money off the novelty of its name.

The point is to find a series of (badly spelled) first year philosophy. It does not present any meaninful point of its own.
The controls are a horrible idea - you walk with your keyboard (no vive controllers allowed) so you can only move in a 180 degree arc.
Environments are blocky, repetitive and low in detail - the load distance is attrocious, so the map looks like mush from any high point.
The MMO aspect does not add anything to the experience at all. There is no voice chat and no physical articulation (see above, no vive controllers allowed), so there is no meaningful way to interact with other players. It is there SOLELY so they can catch your attention with the title "VR MMO".
Do not give them your money.. Train Simulator: The Alaska Railroad: Anchorage - Seward Route Add-On...
A really enjoyable experience. This route is one of the most picture perfect routes I've seen on TS. Some steep grades, awesome views and a good selection of power and freight cars. The Engines work well and overall I highly recommend this route..
FoxyLand is a fun platformer. But is a little difficult. I feel like the gameplay should be made a little smoother, but defiently worth the money.. IDK why i bought this game, maybe because i love ♥♥♥♥♥. It's a fun, little, point n' click adventure story. For those that like that genre, and I do, this game is well worth the purchase price. I was not familiar with the Jonathan Boakes game series, so I've gone on to purchase the preceding Lost Crown game. But fear not, you don't need to have played to other games to enjoy this adventure game. I'd recommend you give it a try.. magari gadavi tamashia. This game isn't bad, but be warned that controls aren't good. There are better physics\/puzzle games on steam, but this one is still playable.. Every game need a demo(try game free first) and be on english ,, Like to try is game ...

Looking after steam gift ,,,,.
